

NUMBER[®] SHARK v5

Numbershark teaches and reinforces numeracy in ways which add meaning and understanding to numbers.

Numbershark works particularly well on the difficulties which lead students to dislike maths. It aims to address **poor attention span and short term memory**, to **rehearse sequencing skills** and to **promote a sense of number**.

The program features over 50 games designed to give meaning to numbers and number operations. They aid the **teaching of concepts** and **provide the necessary practice**. There is a recommended set of games for every topic you choose.

You can quickly find the work you need. The 500 **number topics** are **finely graded**.

Mental Maths and strategies are well addressed at all levels.

Personal learning
can be supported by
setting up individual
programmes of work

Worksheets can be
printed out

Numbershark covers

Operations + - x ÷

Numbers to 7 digits

Negative numbers

Common percentages

Fractions & Decimals

Worded problems

Maths Vocabulary

- ▶ The variety of games promotes both **understanding** and **the memorising of number facts** as well as the use of **standard written methods**.
- ▶ The games include practice in different aspects of **place value, ordering, grouping, commutativity, exchange and links between operations**.
- ▶ **Rods, number line, scale, digits, words, abacus, number pad and 100 square** show numbers in many of their different formats.
- ▶ **Over 2000 worded problems** help put numbers into context.

Help screens can be shown
alongside games as you
play them

Praise for Numbershark

"Numbershark is loved by all my pupils... I find it significantly improves their numeracy and confidence in using numbers"

Ann Clark, Dyslexia Consultant, Hemel Hempstead

"Really excellent...an enormous range from absolute basics to advanced abstracts.. Works right across the age range"

Comment by contributor to the PATOSS resource list

"The records are really useful. They can show you in detail what the children are struggling with, and what they are succeeding at"

Lisa Nicholson, Teacher at Livingstone Primary & Nursery School, Barnet

"Because of the simple interface these children learn to work independently on the computer and this enables them to progress without extra teaching assistant support... it is the best program I have found... I cannot recommend it highly enough."

Gemma Mcdowell, Teacher, Stroud

Praise for Wordshark

"Wordshark has been an integral element of my Specialist Literacy programme...Our network version enables me to programme for each student, and train staff to manage it themselves. A brilliant resource!"

Amina Humayun Khan, GEMS Wellington International School

"I have been using both Wordshark and Numbershark for many years...excellent value, great menu of courses with vast amount of materials, engaging versatile, fun, with opportunities built in for lots of repetition and overlearning. Best of all, children love using them!"

Jan Levi, Advisory teacher in SEN, Wortly

"This brilliant program teaches phonics for spelling and reading in a fun way... It is a program no school and no parent should be without"

Jan Poustie, Editor Solutions

"It is one of those programs that teachers instantly recognise as having educational integrity"

Educ@Guardian

"Wordshark can be adapted in so many ways to suit each individual child. It allows you to set up group or individual lists for each child"

Jo Smith, teacher at Bridge and Patixbourne School, Canterbury
